

FIP PLUS

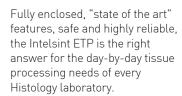

New features on the PLUS model:

- -Backlighted reagent tanks to facilitate the evaluation of the reagent level inside the tank.
- -Backlight with color change related to the status of the reagent :

green color = reagent good red color = reagent need to be changed

-RFID sensor on each tank (12 sensors per instrument) to check :

- Tank present/not present
- Tank in correct/uncorrect position
- Tank inserted correctly/not inserted correctly
- Tank containing the correct reagent fot that position (only for tanks prefilled in the factory with Intelsint RFID tag)

With a processing capacity of 450 specimens, three paraffin containers and an easy to operate HMI (Human Machine Interface) it sets itself at the top of the category.

Designed with specimens safety and operator ergonomics in mind, the ETP is also capable of performing in unfavorable environments.

Simple and economic service and maintenance is one of the benefit of Intelsint ETP.

The new features of the PLUS model are strictly related to the RMS system and allow to:

- reduce drastically the possibility to make errors during the management of the reagents.
- make the work of the laboratory technician easier and safer
- increase the quality of processing
- reduce the risk of samples over or under processed
- reduce the quantity of samples that need to be reprocessed (this can occur during the use of any type or model of tissue processors when the quality of the reagent is not managed correctly)

EFTP PLUS

New features on the PLUS model:

- -Backlighted reagent tanks to facilitate the evaluation of the reagent level inside the tank
- -Backlight with color change related to the status of the reagent : green color = reagent good red color = reagent need to be changed
- -RFID sensor on each tank

(12 sensors per instrument) to check:

- Tank present/not present
- Tank in correct/uncorrect position
- Tank inserted correctly/not inserted correctly
- Tank containing the correct reagent fot that position (only for tanks prefilled in the factory with Intelsint RFID tag)

Fully enclosed, "state of the art" features, safe and highly reliable, the Intelsint EFTP is the safest and most cost effective answer for FAST BIOPSIES PROCESSING and overnight tissue processing needs of every Histology laboratory.

The EFTP is the fastest non-microwave tissue processor today available. Up to 450 biopsies can be safely processed in 40 minutes. This result can be achieved with traditional reagents or with most of the Xylene and Ethyl alcohol substitutes available on the market.

The reagents heating is safely performed during filling into the sample processing chamber without any delay by a patented device called EHE (Enhanced Heat Exchanger). Only three reagents (plus fixation) are necessary to successfully and rapidly process biopsies. Every sample is evenly warmed at the desired temperature since the very beginning of each processing step. Any risk of overheating is avoided thanks to the special conformation and the multiple safety devices of the EHE.

The new features of the PLUS model are strictly related to the RMS system and allow to:

- reduce drastically the possibility to make errors during the management of the reagents.
- make the work of the laboratory technician easier and safer
- increase the quality of processing
- reduce the risk of samples over or under processed
- reduce the quantity of samples that need to be reprocessed (this can occur during the use of any type or model of tissue processors when the quality of the reagent is not managed correctly)

User friendly graphics and Intuitive HMI (Human Machine Interface)

III DE WINNER

1 Port for External Wax Dumping

Sample Processing Chamber:

- Entirely made of high quality Stainless Steel
- Safe and easy to operate lid lock mechanism
- · Special, easy to clean, surface treatment Gas piston to keep the lid open

• Lid open/close sensor

USB Port for Data Backup and Software Automatic Upgrades

- Backlighted reagent tanks to facilitate the evaluation of the reagent level inside the tank.
- -Backlight with color change related to the status of the

green color = reagent good red color = reagent need to be changed

- RFID sensor on each tank (12 sensors per instrument)

5 liters reagent tanks

Xylene free all INTELSINT tissue processors can efficently work with xylene substitutes

ETP - features check list

- **Overnight Processing**
- Reagent Management System
- Remote Fill & Drain
- 450 sample capacity
- 15" Touch Screen Operation Control
- 3 Level Sensors
- 🏏 Reagent Partial Load Capacity
- Wax Cleaning Cycle
- **Data Backup on USB port**
- 18 Process Programs
- **Reverse Processing Special Program**
- Process End Time Management
- **Fume Control Charcoal Filter**
- **Anti-blackout and Power Failures Devices**
- **Remote Alarm**
- **Remote Monitoring and Servicing**
- Factory Pre-filled Reagents
- Xylene Free
- Remote Alarm by Email
- **Remote Control by Internet**
- **Backlighted Tanks**
- RFID sensor on each tank

EFTP - Technical Specification

Sample Processing Chambers	INOX
Sample baskets	3
Sample Processing Capacity	450
Reagent Tanks - 5 Liters capacity	12
Paraffin Containers - 5 Liters capacity	3
EHE for Fast Processing	1
SPC Level Sensors	3
Reagent Partial Load Capacity	Yes
Charcoal Filters	1
Remote Fill & Drain Ports	2
Wax Dumping Port	1
Color Touch Screen	15"
Processing Programs	18
Purge Reagents	2
Reagents Temperature Range (°C)	20-65
Paraffin Temperature Range (°C)	55-65
Process Start delay Time	Up to 2 weeks
RMS - Reagent Management System	Yes
RFD - Remote Fill & Drain	Yes
PWD - Protected Wax Dumping	Yes
USB Ports	4
Printer Ports	1
Remote Alarm Port	1
Network Ports (Ethernet)	2
Approvals	CE/IVD/UL
Backlighted Tanks	12
RFID sensor on each tank	12
Rating (50/60Hz)	115-240V 50-60Hz
Available software languages	12
